# PDS FOUNDATION

PDS Foundation provides best practice data staging to deliver industry-proven data marts tuned to meet your healthcare organization's unique analysis and reporting requirements. It uses industry-standard optimized star schema data structuring to facilitate rapid deployment of your organization's preferred analytics software platform.

PDS works with your data warehouse team to implement tested data marts and derived tables for optimized visual reporting. Modeled data can be sourced from various applications, including revenue cycle, patient access, clinical, quality, general ledger, and more. And we deliver technical documentation including ERD and schema on the PDS Foundation design, process, and ETL updates to ensure a comprehensive solution.

## Key Benefits

- PDS expertise in staging healthcare data accelerates visual dashboard and reporting initiatives
- Offers proven, timely, best practice data marts for your organization's preferred analytics software platform
- Easily integrates with current data warehouse and ETL processes
- Facilitates rapid deployment for integration with enterprise-wide data warehouse initiatives

Contact PDS today to see how **PDS Foundation** and our 20+ years of experience staging data for healthcare analytics software platforms can benefit your organization.
